OBJECTIVES

My **short-term goal** is to become a proficient **back-end developer** who wants to understand, apply, and deploy complex-but-efficient software architectures. In the **long run**, I aim to evolve into a **software architect**. To have a comprehensive and thorough understanding of what my product does, how it operates, and how it helps people collaborate smoothly with one another through my design is my aspiration.

EDUCATION

University of Science   *Oct 2021 - Now*

- Major: Software Engineering
- Third-year student
- GPA: 3.5/4.0 | Major GPA: 3.9/4.0.

SKILLS

- Back-end: ASP.NET, NodeJS, SQL Server, Entity Framework.
- Front-end: HTML, CSS, JavaScript, ReactJS.
- Pattern: Code first Migration, Dependency Injection, MVC
- Others: GIT, Teamwork, Logical thinking.

PROJECTS

ResumeManagement   *May 2024 - Jul 2024*

- Description: A web application for recruiting and applying for jobs.
- Feature: JWT authentication. Apply CV, CV Management, Post jobs position.
- Technology used: ASP.NET Core, Entity Framework Core, ReactJS.
- Pattern: Three Layers, Dependency Injection, Code First Migration.
- Github: https://github.com/cvtai105/ResumeManagementSystem

MyShop - *Individual project*   *Sep 2023 - Nov 2023*

- Description: A local Windows application for managing electronic items.
- Features: Paging with filter and sorting, data analysis with chart visualization, CRUD operations.
- Technology used: C#, .NET 6, Entity Framework, WinUI/WPF, MSSQL.
- Architecture: MVVM, Three Layers
- Github: https://github.com/cvtai105/MyShop.

B3TShop   *Nov 2023 - Dec 2023*

- Description: Local host web application for selling and managing products
- Features: CRUD, Google Authorization, Paging, Cart, Payment System.
- Team size: 3
- My responsibilities: Design, implement front-end, Implement business logic function.
- What I learned: JWT authentication, MVC, Figma, ReactJS.
- Github: https://github.com/tttan308/B3TShop.
